

ELVIS SKENSBERG

050-709-0865 | eskensberg@gmail.com | [LinkedIn](#)

- **AI-Driven Delivery Specialist & Senior .NET Engineer (9+ Years):** Accelerating the SDLC by integrating **Claude.ai**, **GitHub Copilot**, and **Gemini** to bridge the gap between complex business logic and high-availability production code.
- **Architect of Self-Validating Systems:** Expert in **Multi-Agent Prompt Engineering** to orchestrate E2E CI/CD pipelines, ensuring resilient releases and "zero-day" delivery maturity.
- **Proven Scalability:** Built and scaled microservices and payment platforms (Google Pay partner) with a focus on high-performance architecture and reliability.
- **Strategic Technical Leader:** Aligning stakeholders and engineering teams through AI-enhanced Agile workflows to unblock delivery and maximize ROI across global markets.

Technical Skills:

AI Agent Engineering: developing features with E2E self-tested strategies for guaranteed and verified CI/CD

Backend: .NET 8, C# 12, Entity Framework Core 8, SQL

Frontend: Flutter, Dart, React, Next.js, Vue.js, TypeScript, Angular, Tailwind CSS

Cloud & Infrastructure: Azure (Functions, Storage, Service Bus, Cosmos DB), Kubernetes, Docker

Development Practices: Clean Architecture, TDD, Integration Testing, CI/CD (Azure DevOps), Agile, JIRA

Monitoring & Documentation: Datadog, k6 Load Testing, OpenAPI, Spotlight Studio

Professional Experience:

2025 - 2026: Senior Full Stack .NET/Flutter Software Engineer, Netafim (Agrotech)

- Strategic Launch: Secured critical seasonal market entry for a new farming device by utilizing multi-agent AI orchestration to deliver a self-tested backend and Flutter mobile app under high-pressure investor milestones.
- Orchestrated multi-agent workflows with full E2E self-tested continuous delivery, ensuring high-availability production deployments and screenshot validations.
- Delivered complex Android/iOS product features under tight deadlines using Dart & Flutter Framework and .NET API Backend hosted on Azure.

2021 - 2025: Senior .NET Software Engineer, Zip Co – Fintech (ASX: ZIP)

- Engineered payment infrastructure processing \$500M+/month with 99.999% uptime, critical for core revenue.
- Strategic Partnership: Spearheaded the architectural design and delivery of the **Google Pay integration** (Zip's most significant partnership) under aggressive deadlines. Collaborated directly with Google engineering teams to build an event-driven solution using .NET 8, C# 12, Cosmos DB, and Azure Kubernetes, resulting in the company's highest-ever customer acquisition and conversion rates.
- Enabled Mexico market entry by delivering complex financial compliance APIs under strict regulatory deadlines.
- Launched a Vue.js widget with Optimizely for real-time experimentation, directly boosting merchant conversion.
- Internationalized the Angular Customer Portal, enabling rapid expansion into new territories.

2020 - 2021: .NET Software Engineer, BrightHR Ltd.

- Developed HR microservices using .NET Core 3.1 and Azure Functions with comprehensive CI/CD pipelines.

2019: .NET Software Engineer, RedBear Software Ltd.

Delivered microservices architecture using .NET Core 2.2 and Azure Container Instances for SaaS applications.

2018 - 2019: .NET Software Engineer, Fanatics (Int) Ltd. – built e-commerce platforms using CQRS/RabbitMQ.

2018: .NET Software Engineer, Think Money Group – Designed an AI-powered Twilio SMS bot.

2016 - 2018: .NET Web Developer, Amaze Ltd. (Valtech) – worked on web agency web CMS (EpiServer) projects.

Education:

B.Sc. Mathematics, Manchester Metropolitan University

BTEC National Diploma in 3D Design Level 3, The City of Liverpool College

Languages: English - Native | Russian - Fluent | Hebrew – Conversational
