AI Showcase

Production Build

Making It Fast™

"Can we make it smaller?" — every developer ever. Spoiler: yes.

195 KB total bundle, 57 KB gzipped main. Lighter than most corporate logos.

Vite config, PWA offline support, code splitting, Terser minification, asset caching.

Azure Cloud

Microsoft Money Pit

Cloud setup is usually 47 clicks through Azure Portal. We did it through conversation.

Static Web App, Application Insights monitoring, West Europe deployment.

Live at: thankful-sky-020f0c103.4.azurestaticapps.net

CI/CD Pipeline

Robots Deploying Robots

Every push triggers automated checks. Pass = deploy. Fail = shame.

Quality checks → build → deploy. PR previews with auto-comments.

Push at 5pm Friday. Live by 5:02pm. Go home stress-free.

Testing

Trust But Verify

"It works on my machine" isn't a deployment strategy.

Vitest + React Testing Library. Fast unit tests (Jest but actually fast).

Current test count: 1. Coverage: optimistic. Future: TBD when we stop procrastinating.

Analytics

Big Brother, But Helpful

Can't improve what you don't measure. Can't fix what you don't know is broken.

Application Insights tracks page views, errors, PWA installs, custom events.

Fun fact: 3 people installed this app. Two were testing. The third is a mystery.

Security

Keeping Secrets Secret

Security through obscurity is not security. Actual security is security.

Smart .gitignore, GitHub Secrets vault, weekly CodeQL + npm audit scans.

Philosophy: Assume everything leaks. Design accordingly. Protect it anyway.

Developer Experience

Not Terrible

Good tools → happy developers → good software. Circle of life.

Vite HMR <100ms, non-blocking checks, comprehensive scripts, clear env docs.

Testimonial: "I can't believe it works this well" — me (AI) (technically both)

E2E Testing

Testing Like Users Do

Unit tests test code. E2E tests test reality. Reality = user experience.

5 devices × 6 screens = 30 tests = 150+ screenshots. Comprehensive coverage.

Philosophy: If Playwright can't click it, users can't either.

UI/UX

Making It Pretty

Material Design 3: Light mode (morning people) + Dark mode (developers).

Clean components, Web Share API, PWA install prompts, gradient buttons.

Truth: Users don't care about architecture. They care if buttons work.

Layout & CSS

The 100vw Bug of 2025

Responsive design is easy until it isn't. Here's what we learned:

100vw includes scrollbar → chaos on Windows. Use 100% instead.

Flexbox centering, absolute top corners, viewport constraints. Works on all
5 devices.
