

Zero Coding!

100% AI Vibe Coding

My journey to building enterprise level Front End App with just AI

Azure Cloud

Cloud Infrastructure

Deployed on Azure Static Web Apps with Application Insights monitoring.

West Europe region for optimal performance.

Live at: thankful-sky-020f0c103.4.azurestaticapps.net

CI/CD Pipeline

Automated Deployment

Automated quality checks, build, and deployment on every push.

PR previews with automatic status comments.

Continuous integration ensures code quality and reliability.

Testing

Quality Assurance

Comprehensive testing with Vitest and React Testing Library.

Fast unit test execution with modern testing infrastructure.

Continuous integration with automated test runs.

Analytics

Application Insights

Real-time monitoring with Azure Application Insights.

Tracks page views, errors, PWA installations, and custom events.

Data-driven insights for continuous improvement.

Security

Best Practices

Secure secret management with GitHub Secrets.

Automated security scanning with CodeQL and npm audit.

Smart .gitignore configuration to prevent credential leaks.

Developer Experience

Modern Tooling

Vite HMR with sub-100ms hot module reload.

Comprehensive npm scripts for development workflow.

Clear environment configuration and documentation.

E2E Testing

Playwright Automation

End-to-end testing with Playwright across multiple devices.

30 automated tests generating 150+ screenshots for visual regression.

Tests cover 5 device profiles ensuring cross-platform compatibility.

UI/UX

Material Design 3

Implements Material Design 3 guidelines with light and dark themes.

Clean component architecture with Web Share API integration.

PWA install prompts and progressive enhancement features.

Layout & CSS

Responsive Design

Fully responsive layout working across all device sizes.

Fixed viewport width issues (100% instead of 100vw).

Flexbox-based centering with absolute positioning for UI controls.
